## 3-year PhD position

The Pervasive Computing group at Klagenfurt University has an open 3-year PhD position. The successful candidate will work in the research project "Autonomous Traffic Monitoring by Embedded Vision" which is a joint project with Graz University of Technology (Prof. Bischof) and EFKON AG (Graz) funded by the Austrian FIT-IT [visual computing] program.

We invite applications from candidates with research interests in pervasive computing, embedded systems and computer vision. Relevant areas include distributed embedded systems, sensor fusion, embedded vision and multimedia. A graduate degree in EE, CE, CS or related fields is required.

Workplace: Klagenfurt University, Lakeside Park

Duration: 3 years

Salary: approx. EUR 26.000/year (gross)

Starting time: as soon as possible

Send your application to:

Prof. Bernhard Rinner
